

Recommended Uninterruptible Power Supply

Do you need an uninterruptible power supply (UPS)?

If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). We've reviewed our recommendations and are confident these are still the best UPS devices you can buy. Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

Why should you buy an uninterruptible power supply?

A UPS serves a backup battery role in case of a sudden power outage, preventing your PC from shutting down before you're able to save your work, close your game, etc. A UPS is an ideal pick for anybody who wants clean and stable power delivery to their PC. What Makes an Uninterruptible Power Supply Brand Good?

What is the best uninterruptible power supply brand?

The best uninterruptible power supply brand is going to be whichever one is selling the best UPS for your rated capacity and price point. It will most likely be CyberPower, APC, or Liebert, but the specific answer will depend on the day you're reading this article.

What are the different types of uninterruptible power supply?

There are two types of uninterruptible power supply to look out for when shopping around for your gaming PC: sine-wave and simulated sine-wave. Sine-wave UPS backups deliver a smooth, consistent oscillation of AC power directly to your PSU.

Who makes uninterruptible power supply?

APC was founded in the United States in 1981, and is another prominent Uninterruptible Power Supply brand. APC is probably the most well-known provider of UPS devices in general, known for providing premium UPS units for about as long as they've been in business.

How much wattage does an uninterruptible power supply support?

Whenever you're shopping for an Uninterruptible Power Supply, one of the main things you'll want is enough wattage to power your PC. However, UPSes are sold with labeling in VA instead of Watts-- so a 1500VA UPS actually supports a maximum of 900 Watts, for example.

Hey guys. I just experienced a brown out and I'm deciding to actually invest in a UPS. I do have a very good power supply/conditioner but I want more protection. I have a high end gaming PC Rtx 2080 rog strix I7 9700k 3 ssds Asus rog strix z390 Season prime ultra 750w psu Corsair h115i pro platinum aio Alienware aw3418dw monitor Corsair rgb mk2 ...
