

Rog outdoor power

How much does an ASUS ROG outdoor power station cost?

There's no word on how much an Asus ROG-branded outdoor power station named after Thor's hammer might cost, but considering the display looks like it says 768W, we expect it'll probably be upwards of \$600. The perfect way to complete your off-the-grid gaming setup!

What is a Rog Mjolnir power station?

ASUS ROG just published an interesting post on X/Twitter, previewing a future product: the ROG Mjolnir power station. This portable power solution aims to provide uninterrupted gaming experiences, even in outdoor settings. The ROG Mjolnir boasts interesting features catering to modern outdoorsy gamers' needs.

Can a Rog Mjolnir power station be used as a torch?

A nice touch is that ASUS uses the handle of the ROG Mjolnir power station as a torch or light source, which would be an excellent addition to an outdoor gamer (there are some) or even a gamer on the go in a van.

What is Rog Mjolnir portable gaming ups?

ROG Mjolnir Portable Gaming UPS is designed for both indoor gaming and outdoor activities, with 768Wh LFP battery, 10ms switchover time, USB Type-C fast charging, and Qi 2.0 wireless charger with MagSafe compatibility. ©ASUSTeK Computer Inc. All rights reserved.

The 2025 ROG lineup is here. Leading the charge is the ROG Strix SCAR, complete with an all-new chassis design, a revamped cooling system, and next-gen hardware. The Flow Z13 tablet features a cutting-edge processor that perfectly blends performance and power efficiency. ROG gaming laptops are the ideal choice for gamers and content creators alike.

\$36.95 - \$ 48.45 Select options This product has multiple variants. The options may be chosen on the product page Fiebing's Golden Mink Oil \$ 9.85 Add to cart Axe Sheath for Gransfors Bruks Wildlife Hatchet (and G.B. Large Carving Hatchet, Carved Handle)

Summary: All in all, I appreciate the refreshed design of this 2025 Asus ROG Strix Scar 18, although ergonomics still leave plenty to be desired. The gains in performance are within 15-25% on the CPU side and more or less 10-15% on the GPU side over the previous Scar 18 generation, but the overall behavior is improved, thanks to the refined thermal module and ...
