

Sales AC Inverter Quote

Should you buy a non-inverter or inverter AC?

A non-inverter AC will cool your room faster, since the motor runs at full blast when it switches on. The AC price of an inverter air conditioner is also likely to be on the higher side. But on the other hand, inverter ACs tend to be more energy efficient and also last longer because there's lesser wear and tear of the motor.

Are 5 star rated air conditioners more expensive?

While five-star rated air conditioners are more expensive than ones with three or fewer stars, the high rating means that it is more energy-efficient. However, AC prices are quite reasonable, but they consume more power than most household appliances. So, paying more money in the short term will help you save money in the long run.

How does a non-inverter air conditioner work?

Let's start with a non-inverter air conditioner. In these ACs, the compressor motor has a fixed speed. This means that the motor runs at full speed to cool the room, and when the desired temperature is reached, it stops completely. These repeated on-off cycles cause the compressor to consume a lot of electricity.

Should you buy a five-star air conditioner?

However, AC prices are quite reasonable, but they consume more power than most household appliances. So, paying more money in the short term will help you save money in the long run. While consuming less energy, a five-star air conditioner will also offer better cooling.

What is the difference between an AC and a Smart AC?

The biggest difference between an AC and a Smart AC is that the latter can maintain or enhance the ambient temperature in your home by using a smartphone. A smart air conditioner can be controlled using an app on a phone or tablet. A smart AC connects to other devices through the internet.

Should you buy AC Online?

Before you buy AC online, you have to ensure that you have a space in your home for it to be conveniently installed. A window AC is compact and easy to install; it only needs to be attached to a window. A split one is a little more difficult to install as the compressor unit needs to be installed outside the house.
