

Senegal New Tool Battery

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector."

Will Senegal's 'Infinity Power' Project help reduce electricity costs?

Expected to be one of the lowest cost producers of electricity in Senegal, the project is helping reduce the cost of electricity generation in the country, which has one of the highest generation costs in Sub-Saharan Africa. Infinity Power is Africa's largest pure play renewable energy provider.

Why did FMO sign a flagship project in Senegal?

Huib-Jan De Ruijter, Co-Chief Investment Officer at FMO said: " Through the signing of this flagship project, FMO is delighted to mark its continued commitment to Senegal's vision for a sustainable energy sector.

How will Senelec save the grid?

The BESS will support Senelec in reducing its dependence on reserve capacity derived from thermal plants, with Senelec estimating that the BESS will save the grid an estimated \$165 million over its operating life.

The project will provide clean, reliable energy for 235,000 people in Senegal. Largest photovoltaic with added battery energy storage systems (BESS) project in West Africa, accelerating the uptake of critical battery technology in the region. The investment supports Senegal's drive to reach 40% of renewable energy ...

The developer claimed it is the first battery storage project in West Africa dedicated to frequency regulation, and will provide stability to the local grid in the face of limited spinning reserves and intermittent renewable generation.

State power utility Senelec has been holding talks with stakeholders to discuss the procurement of 80MWh of battery storage. Senegal has been rapidly procuring variable renewable power and the 158.7MW Taoudia N'Diaye wind project in particular requires more reactive capacity on the grid to be fully dispatched. The project is set to begin commissioning ...
