What is Solar Street Lamp Radar Induction? Solar street lamp radar induction is a type of lighting system that utilizes solar energy to power its LED lights. This technology also incorporates radar sensors that detect motion and ...

In simple terms, Induction technology uses high-frequency magnetic induction to excite mercury amalgam which releases UV light. This UV light is absorbed and re-emitted as visible light by the phosphor coating on the inside on the bulb. The similarities to fluorescent technology are readily apparent - only the "excitement" of the amalgam differs.
