A Solar (PV) system is composed of one or more solar panels combined with an inverter and other electrical and mechanical hardware that use energy from the Sun to generate electricity.

The lighting units use quality components. The solar panels are 24% efficient (about as good as you can get commercially) and the LED lights are among the best at 160 lumens per watt (lm/W). The more lm/W a lamp produces the more efficient it is.

your choice for Solar Systems Services, Smart Buildings Solutions, Telecommunication Systems, Procurement and related Services. Don't bother yourself with electricity bill, we offer ...

It is a great benefit to our community to have this [Avlite's helipad lighting system] installed and commissioned at CareFlight's Toowoomba base. Avlite's particular type of lighting lends itself to a lot of applications given that it's easy to install, doesn't require electricity as its solar powered and can be remotely

controlled.
