

# Solar tile system home complete set

How do I install the Marley solartile system?

See how simple it is to install the Marley SolarTile system. The solar panels and flashings can be fitted to the roof first and then the roof covering fixed around them. Integrated solar panels are also easy to install as a retrofit option. Simply remove the necessary section of roof tiles or slates, and replace with the solar panels.

Are solar PV roof tiles a good choice?

An ideal choice for both roof refurbishments and new-build projects, Solar pv roof tiles provide an uncluttered aesthetic with no visible brackets or racking, as well as easy maintenance and our market-leading 15-year guarantee. Marley SolarTile can be fitted as part of a typical roofing project and installation is fast.

Can solar roof tiles be used as a roof covering?

Solar Roof Tiles act as both a roof covering and electricity generating solution. Interested? Click here to request more information Buy online How to install Marley SolarTile roof panels replace standard roofing tiles or slates, giving you the benefit of both a weatherproof roof covering and electricity generating solution.

Does Marley solartile work?

Marley SolarTile alone offers exceptional wind and fire resistance, but when combined with the complete Marley Roof System, the security of a roof that works to keep the weather out, also works to generate power for the home. Marley SolarTile is designed to form an integral part of the fabric of the roof.

What are Marley solartile roof panels?

Marley SolarTile roof panels replace standard roofing tiles or slates, giving you the benefit of both a weatherproof roof covering and electricity generating solution. They enhance design possibilities, creating sleek aesthetics and provide exceptional wind and fire performance.

How long does it take to install Marley solartile?

Marley SolarTile can be fitted as part of a typical roofing project and installation is fast. Thanks to the patented push-together design, installation times for your solar rooftop can be less than one hour per kilowatt peak.
