

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

Where are power generators made?

Power generators are manufactured at different locations in Europe according to ISO 9001. The total production capacity is about 40.000 units a year. An extensive stock-keeping allows short production and delivery times: most types of power generators can be delivered within 2 to 4 weeks.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.
