What is a solar inverter?

A solar inverter is a device that converts the direct current (DC) from your solar panels into alternating current (AC) that you can use or sell to the grid. There are different types of solar inverters depending on your needs and preferences. At Power Gardens, you can choose and buy any type of inverter that suits your needs.

What is the difference between 12V and 24V solar inverters?

12V solar inverters: usually for small installations of no more than 2000W. A low voltage (12V) implies more wiring to reduce losses, so this voltage is usually used for installations that mount batteries with low storage capacity, i.e. small installations. - 24V solar inverters: usually for medium-sized installations of no more than 5000W.
