

Suspension of photovoltaic cell module exports

When will solar module imports be taxable?

Pursuant to the Presidential Proclamation issued on June 6, 2022, duties will not be collected on any solar module and cell imports from these four countries until June 2024, as long as the imports are consumed in the U.S. market within six months of the termination of the President's Proclamation.

How many GW of modules did China Export in November 2024?

China exported 15.2 GW of modules in November 2024, down 12% MoM from 17.34 GW and down 14% YoY from 17.71 GW, according to InfoLink's customs data. China exported 219.31 GW of modules from January to November 2024, up 14% YoY from 191.81 GW.

Why is China Shipping solar products through Cambodia?

Commerce found that certain Chinese producers are shipping their solar products through Cambodia, Malaysia, Thailand, and/or Vietnam for minor processing in an attempt to avoid paying antidumping and countervailing duties (AD/CVD).

When did the five-year (sunset) review of crystalline silicon photovoltaic cells & modules start?

The five-year (sunset) reviews concerning Crystalline Silicon Photovoltaic Cells and Modules from China were instituted on February 1, 2024. On May 6, 2024, the Commission determined to conduct expedited five-year reviews.

Are solar cells being circumvented from China?

Because Commerce found that circumvention was occurring through each of the four Southeast Asian countries, Commerce continues to make "country-wide" circumvention findings, which simply designates each country as one through which solar cells and modules are being circumvented from China.

How many GW of modules did the Americas import in November?

The Americas imported 3.2 GW of modules from China in November, up 23% MoM from 2.61 GW and up 4% YoY from 3.08 GW last November. From January to November, cumulative shipments to the Americas reached 30.12 GW, representing a 9% YoY increase from 27.52 GW.

China exported 15.2 GW of modules in November 2024, down 12% MoM from 17.34 GW and down 14% YoY from 17.71 GW, according to InfoLink's customs data. China ...

India also exports PV products to South Africa, Somalia, Kenya, the UAE, Afghanistan, Nepal and Bangladesh. As per the report, despite increased logistics expenses, domestic manufacturers can earn 40-60% higher profit margins on PV module sales in developed nations like the US than in India.

Suspension of photovoltaic cell module exports

This records a decrease from the previous number of 915,033.768 Unit th for Jan 2025. CN: Export: Quantity: Photovoltaic cells: Not assembled in modules or Made up into panels data is updated monthly, averaging 432,303.113 Unit th from Jan 2022 (Median) to Feb 2025, with 38 observations. The data reached an all-time high of 915,033.768 Unit th ...

China exported 18.76 GW of modules in July, down 4% MoM from 19.62 GW but up 9% YoY from 17.29 GW, according to InfoLink's customs data. China has exported 170.24 ...

According to customs data, solar cell (including module) exports decreased by 0.9% month-on-month in May and plunged 38.7% year-on-year. Cumulative exports from ...

The export volumes of wafers, cells, and PV modules reached 70.3GW, 39.3GW, and 211.7GW, respectively, with year-on-year growth rates of 93.6%, 65.5%, and 37.9%. This leap forward shows the competitiveness of Chinese PV products in the global market and reflects the high degree of international market dependence on Chinese PV products ...

crystalline silicon photovoltaic cell. Where more than one cell is permanently integrated into a consumer good, the surface area for purposes of this exclusion shall be the total combined surface area of all cells that are integrated into the consumer good.

The United States International Trade Commission is an independent, nonpartisan, quasi-judicial federal agency that fulfills a range of trade-related mandates. We provide high-quality, leading-edge analysis of international trade issues to the President and the Congress. The Commission is a highly regarded forum for the adjudication of intellectual ...

It was a bumpy year for the PV industry in 2021. While experiencing polysilicon price surge, China's energy intensity control, and dramatic supply chain prices fluctuation, global installed capacity posted stellar performance. InfoLink estimates the world to have added 172.6 GW of installed PV capacity in 2021, a 23.1% YoY increase. Installed capacity outside of ...

From 2022 and onwards the code 85414200 (Photovoltaic cells not assembled in modules or made up into panels) is excluded from this dataset. In 2022, unassembled modules accounted for 8.7% of total photovoltaic cell exports by value. Module Price. Average monthly PV module prices are sourced from InfoLink Consulting Group. For this dataset, only ...

Solar manufacturing status: This portal give brief status of the solar PV module manufacturing in India. It provides export and import status of key components used in solar panel manufacturing Manufacturing resources: The portal shall provide access to resources such as manufacturers of Solar equipment, raw materials, and supply chain partners ...

Suspension of photovoltaic cell module exports

China's solar module exports fell to 16.53 GW in September, down 12% from August and 16% year on year, according to PV InfoLink. Third-quarter exports reached 54.9 GW, a 15% drop from the second ...

In response to review requests from multiple parties, in accordance with 19 CFR 351.221(c)(1)(i), on February 8, 2024, Commerce initiated an administrative review of the antidumping duty (AD) order on crystalline silicon photovoltaic cells, whether or not assembled ...

The massive uptick in Indian module imports to the US in the past few years - and in particular 2023 as shown in Figure 1 - has come about in part from excess product availability by Indian ...

As India strives to boost its domestic solar module manufacturing, the recent suspension of the Approved List of Models and Manufacturers (ALMM) regulation has left the industry in disarray, causing policy certainty.

Pursuant to the Presidential Proclamation issued on June 6, 2022, duties will not be collected on any solar module and cell imports from these four countries until June 2024, as ...

This represents a 4% decrease in the rebate rate for photovoltaic exports, significantly impacting China's PV market, which heavily relies on exports. Export tax rebates refer to the refund of domestic taxes (such as product tax, value-added tax, business tax, and special consumption tax) paid during the production and circulation of exported ...

New manufacturing lines with updated technology have made sure that some module manufacturers are able to get export orders. In addition, many manufacturers who are installing new manufacturing lines with imported machinery are obligated to export a certain share under the Export Promotion Capital Goods (EPCG).

By the end of May 2024, total exports of PV modules this year totaled \$13.62 billion, or about 97.9 GW. From the country distribution point of view, the Netherlands, Brazil, Saudi Arabia and other countries continue to lead the PV module export market, in May the export volume of these three countries are more than 1GW.

The U.S. International Trade Commission (USITC) today determined that revoking the existing antidumping and countervailing duty orders on crystalline silicon photovoltaic cells ...

As in the Preliminary Determination, all importers from the targeted countries (including the non-cooperative companies) can avoid the imposition of antidumping and ...

Currently, China is the world's leading producer and exporter of photovoltaic products, having established a comprehensive PV industry that includes silicon mining and refining, ingot/wafer ...

export performance or upon the use of domestic goods over imported goods. ... photovoltaic cells produced in

Suspension of photovoltaic cell module exports

a customs territory other than China. ... and that consumes the electricity generated by the integrated crystalline silicon photovoltaic cells. Where more than one module, laminate and/or panel is permanently integrated into a consumer ...

According to Mercom India's "State of Solar PV Manufacturing in India" report, India's solar photovoltaic module manufacturing capacity exceeded 39 GW at the end of September 2022 and is expected to reach ~95 GW by the end of the calendar year 2025.

Europe imported around 33GW of solar PV modules from China in the first four months of 2024, representing 43% of total Chinese module exports, according to US energy analyst Clean Energy ...
