

Temporary Home Solar Lights

How do solar powered temporary lights work?

Using commercial solar powered temporary lighting is an efficient way to reduce electricity bills to zero. Our 100% off-grid system helps you save big as it does not require trenching and has low maintenance costs over time. HOW DO SOLAR PORTABLE LIGHTS WORK? During the day, photons strike the photovoltaic solar panel.

What is commercial solar powered portable lighting?

Commercial solar powered portable lighting is an efficient way to drastically decrease electricity bills. Our 100% off-grid system helps you save big money as it does not require trenching and has low maintenance costs for temporary construction lighting. Greenshine has more than 30 years of experience in offering portable led light towers.

What is a mobile solar lighting tower?

The Mobile Solar Lighting Tower comes in a variety of configurations to meet your site lighting, temporary construction lighting or construction site lighting plans. Because these portable construction lights are powered by the sun, they run completely silent and create no vibration.

What is a Porta solar light?

The Porta, developed by Greenshine's innovative team, is a 100% solar-powered portable lighting system in the commercial lighting industry. The Porta series of solar lights are perfect for a variety of use cases, such as lighting a temporary parking lot at a music or sporting event, or lighting up city streets.

Why should you choose a portable solar light tower?

Less maintenance means less time and money spent on temporary lighting for construction sites. Our portable solar light towers are constructed with mono-crystalline panels that are the most efficient on the market today (20% of total possible power), surpassing poly-crystalline (rated at 15% efficiency).
