What Is a Solar Inverter? A solar inverter, also known as a PV inverter, is a type of electrical converter that converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network. Basically, a solar inverter is a ...

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For ...
