Transformation Overview. In order to provide low transmission loss of high-voltage electricity, TEPCO Power Grid transmits electricity from our power stations at 500,000 V and 275,000 V, and the voltage is sequentially reduced to 154,000 V and 66,000 V as it nears areas of demand until it is finally reduced to 200 V and 100 V for delivery to the homes and offices of our customers.
