

Travel portable power supply voltage

Do I need a converter for a 240 volt power supply?

If your device is dual-voltage, you can safely use it for voltages anywhere between 120 V and 240 V. In this case, you'll only need a plug adapter. If you see something like 'INPUT AC 120/240 V 50--60 Hz 1300 W' on your device, it means it's dual-voltage. Travel Smarter!

Do I need a travel adapter for my devices?

When traveling abroad, you need to know what type of adapter is needed to plug your devices into the outlet. All electrical sockets are not created equal, and you should ensure you have the right travel adapter for your destination.

Do I need a voltage converter?

A: Yes, provided you have the appropriate adapter plug for the power outlet in your destination country, and your device is rated for the same voltage as the power supply in that country. If the voltage is different, you will need a voltage converter or transformer.

Is a travel gadget dual-voltage?

The vast majority of modern travel gadgets are dual-voltage, meaning they automatically convert to run on other voltage systems. Most smartphones, tablets, and other gadgets are dual-voltage.

What devices can I use if my power supply is not compatible?

Examples include hair dryers, travel irons, water heaters, shavers and toothbrushes. If the device's voltage rating is not compatible with the power supply in your destination country, it can be used with either a converter or transformer with the correct wattage range for short periods of time (under 2 hours).

What voltage do most countries use?

The vast majority of the world uses 220 to 240 volts. While Japan, most of North America, and parts of South America and the Caribbean use voltage between 100 and 125, most American-made electrical appliances work at 110 volts.
