What should the outputs and outputs of the Tuvalu energy sector development project be?

Outcomes and outputs (including, but not limited to, technical or policy recommendations, concept design, detailed design, equipment specification) should be consistent with the safeguard policies of the World Bank and the Environmental and Social Management Framework of the Tuvalu Energy Sector Development Project.

How does electricity work in Tuvalu?

Tuvalu consists of three reef islands and six atolls. The provision of electricity to these islands - accessible only by boat - poses complex logistical issues. Currently these locations are entirely reliant on diesel generators, a reliance that comes at a significant economic and environmental cost.

Is Tuvalu A good example of sustainable electricity generation?

Tuvalu is one of many Pacific island countries and territories that are walking the talk and leading by example by switching to environmentally friendly and sustainable electricity generation. It is hoped that the example being set in the Pacific island region will prove to other areas of the world that it can be done.

How will a 24 Hour power supply benefit Tuvalu?

Access to 24 hour power - through the European Union and Government of Tuvalu partnership - will also mean that a greater variety of food items can be transported and stored on the islands which is good for local business as well as for the health and wellbeing of local communities.

How will solar power affect Tuvalu?

Communities on the outer islands of Tuvalu rely heavily on fishing for subsistence, but long interruptions to the power supply mean that fish, and other foods, cannot be stored safely for later use. Access to 24 hour solar power will change this.

Who are the stakeholders of Tuvalu Electricity Corporation?

Institutional stakeholders are the Tuvalu Electricity Corporation as implementing agency, and the Ministry of Foreign Affairs, Trade, Tourism, Environment and Labour. Grass roots stakeholders are the men, women and children who consume electricity.
