

UK Manchester UPS uninterruptible power supply installation project

Why should you install an uninterruptible power supply?

Full after service support, UPS maintenance, warranty provision and UPS servicing schedules for ensuring lifetime longevity. A successful uninterruptible power supply installation can help ensure your power protection system runs at peak performance for years to come.

What is an uninterruptible power supply (UPS)?

Having an Uninterruptible Power Supply (UPS) is a crucial part of preparing your business. In the event of a power outage, mains failure or other interruption, the Uninterruptible Power Supply equipment kicks in (often working with a diesel generator) to keep your business connected.

How do I optimise my UPS (uninterruptible power supply) system?

Optimising your UPS (Uninterruptible Power Supply) system starts with one critical decision--where to install it. Strategic placement not only enhances the longevity and safety of the UPS but also ensures peak performance in the long run. At Vital Power, we ensure your UPS is installed in prime position for your needs.

Where should the ups be installed?

The UPS should be installed close to a stable power source to minimise voltage fluctuations and reduce wiring lengths, which can pose tripping hazards and cause power loss. In terms of security, our team aim to place the UPS in a restricted access area to prevent tampering and unauthorised interference.

How to plan an electrical ups installation for a large project?

When planning the electrical UPS installation for a large project or data room installation, it is crucial that communications between the various contractors and the customer are unhindered by self-interest; the prime motive has to be the interests of the client.

Why should I use ups power services?

UPS Power Services have extended the life of our UPS by providing maintenance when APC would not. Bought new batteries from them at a reasonable price which they installed and took away the old ones. Have also had our first annual service check which gave a detailed report on the UPS.
