Best For: Home PCs, Wi-Fi routers, Smart TVs Backup Time: 5-15 minutes Power Capacity: 600VA - 1.5kVA ... Final Thoughts - Which ...

A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter--which turns the battery's stored energy into usable power--wrapped into one unit.

The Delta line of uninterruptible power supply units includes superb options trusted by leading organizations across a wide array of industries, from financial institutions to medical centers. Small business owners also look to Delta for power solutions that keep their vital equipment running no matter what happens.

Uninterruptible Power Supply (UPS) systems provide power to computer networks in the event of a power shortage or electrical outage so computers and other sensitive electronic equipment can be turned off properly. UPS system batteries keep systems running and help prevent data loss in the event of an unexpected shutdown.
