

Vienna photovoltaic module prices

How did PV module price development in February?

PV module price development according to PV Index of Sunstore. Average trading PV module prices were at 0.124 EUR/W across Europe in February both for bifacial and monofacial modules. PV PMI (Purchasing Managers' Index) score increased from 68 in January to 73 in February, underlining strong demand.

How does pvxchange differentiate between the main technologies available on the market?

In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary.

How do I cite a solar photovoltaic module?

In-line citation If you have limited space (e.g. in data visualizations), you can use this abbreviated in-line citation: Full citation IRENA (2024); Nemet (2009); Farmer and Lafond (2016) - with major processing by Our World in Data. "Solar photovoltaic module price" [dataset].

How does PV index work?

PV Index traces current trading prices for solar components on a monthly basis. Data is recorded on Sunstore, an online PV trading platform with 3 GW+ of components on offer, according to company information. Trading prices are weighted by power of components involved in the transactions to arrive at a reliable estimate for the whole market.

Why is monitoring the price development of solar modules important?

Monitoring the price development of solar modules is of crucial importance for investors, manufacturers and other players in the solar energy industry. A sound understanding of market trends makes it possible to make the most of opportunities and take forward-looking decisions.

What is pvxchange solarshop?

As a way to stay informed about PV price developments and other important trends, pvXchange Solarshop offers a monthly market report. This report provides regularly updated information and analysis to give readers a comprehensive picture of the solar market and help them make informed decisions.

Using annual data on photovoltaic module prices, cumulative production, R&D knowledge stock and input prices for silicon and silver over the period 1990-2011, we identify an experience curve model which minimizes the difference between predicted and actual module prices. This model predicts a 67% decrease of module price from 2011 to 2020.

Improvement trends in PV and other technologies have been studied by various research communities.

fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange..
For the fourth ...

Preisentwicklung von PV-Modulen 2025. Langfristige und kurzfristiger Verlauf. Jährige und monatliche Entwicklungen. Aktuelle Daten und Prognose. Solaranlage. Angebot ...

After a prolonged decline, PV module prices in Europe have shown a noticeable rebound. Data indicates that N-type single-sided module prices have risen by 12%, while P ...

The January edition of the PV dex report from European solar trading platform Sun.store showed that n-type monofacial module prices increased by 12% in January, which sun-store said reflects ...

With prices now trending higher, these issues may soon be resolved, allowing end customers to finally get the reliability they expect from their PV systems. Prices as of Feb. 14, 2025, including ...
