

Wellington air energy storage project launched

Who owns the battery energy storage system in Wellington?

Ampyr Australia, the local arm of Singapore-based outfit Ampyr Energy says it has agreed with Shell Energy Australiat to jointly develop, own and operate the battery energy storage system in Wellington. Once operational, Shell Energy will hold the rights to charge and dispatch energy from the BESS.

When will the Wellington Battery energy storage system be available?

The Wellington Battery Energy Storage System (BESS) will have two stages, the second one of which with 100 MW/400 MWh of capacity. AMPYR said it will now develop both phases, aiming to bring the first one online in 2026 and the second one a year later.

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400 MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

When will ampyr & shell energy build the Wellington Bess project?

The Wellington BESS project is being jointly developed by AMPYR and Shell Energy. Subject to securing all relevant approvals, authorisations and financing, construction is expected to commence in mid-2023. Once operational, Shell Energy will hold the rights to charge and dispatch energy from the Wellington BESS.

Who owns Wellington Battery Stage 1?

AMPYR Australia today said it has acquired its joint venture partner Shell Energy Australia's 50% stake in the 300-MW/600-MWh Wellington Battery Stage 1, thus securing full ownership of the entire 1,000-MWh project in New South Wales. Battery energy storage systems (BESS) License: CC0 1.0 Universal (CC0 1.0) Public Domain Dedication.

What is the target capacity of the Wellington Bess?

The target capacity of the Wellington BESS is 500 MW /1,000 MWh, making it one of the largest battery storage projects in NSW. The Wellington BESS will connect to the adjacent TransGrid Wellington substation, adjacent to the Central West Orana Renewable Energy Zone (Central West Orana REZ).

The two companies launched a joint venture in 2022 to develop the 1GWh Wellington BESS, which will connect to an existing substation of high-voltage transmission ...

Renewables developer Ampyr Australia plans to fast track development of a 400 MW/1 GWh battery energy storage system (BESS) in central New South Wales after buying out former project partner Shell Energy's ...

Wellington air energy storage project launched

The project incorporates a large-scale battery energy storage system (BESS) with a discharge capacity of 500 megawatts (MW), along with connection to the Wellington ...

The Wellington BESS project is being jointly developed by AMPYR and Shell Energy. Subject to securing all relevant approvals, authorisations ...

AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project. The Wellington Battery Energy Storage System will be constructed in two stages. ...

AMPYR Australia today said it has acquired its joint venture partner Shell Energy Australia's 50% stake in the 300-MW/600-MWh Wellington Battery Stage 1, thus securing full ...

AMPYR is developing the Wellington Battery Energy Storage System (BESS) in Central West NSW, designed to store renewable energy for use during peak times. With planning and grid ...

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an ...

Ampyr Australia has acquired Shell's 50% stake in the 300MW Wellington battery energy storage system (BESS) in New South Wales. With its Wellington BESS stage two project (100MW), ...

Ampyr Australia, the local arm of Singapore-based outfit Ampyr Energy says it has agreed with Shell Energy Australia to jointly develop, own and operate the battery energy storage system in Wellington. Once operational, ...
