Are portable power stations worth it?

This power station offers a lot of bang for the buck. Sure, it isn't going to power your house through a days-long outage, but it offers a lot of nice features for the price, making it one of the better values out there, especially if you can pick it up on sale. How long do portable power stations last?

What is the best portable power station under \$200?

For those looking for a power station for off-grid living, the FlashFish 300W "solar generator" is my best portable power station under \$200, thanks to the included MPPT solar charging capability. It packs an impressive 222 watt-hours into a 6-pound unit - after the Anker 521, it's one of the highest capacities I've seen in generators under \$200.

What is the cheapest power station?

At just 18 pounds, the T-1000 is the cheapest power station in its immediate weight class (about 40% cheaper than its immediate competitors). It also appears to go on sale fairly often; as of this writing, it's currently listed at \$470.

What power station should I buy?

For a mid-sized power station, try the Yeti 1000 Core, which offers 1200W and 983Wh capacity. It comes with seven ports and can comfortably power a 42-inch LED TV, a full-sized fridge, microwave, and pellet grill. Perfect for camping, off-grid weekends, van life, or even to use in your backyard.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.
