Step 2. Feed the conduit and cable through the wall. Leave the conduit protruding, and enough cable to connect to the new socket. After that, remove the central knock-out from the box and fit a weatherproof grommet.

As an outdoor socket will need to be supplied by a 30mA RCD protected circuit, you will need to run your supply cable from the supply (normally the consumer unit) to the install location. If your consumer unit is quite far inside your home then you may need to start drilling holes through walls or running cables up through floors, which can get ...
