

Yamoussoukro 15W solar street light

Which solar street light is best?

This RuggedGrade solar street light is a bright one with a total brightness of 3,400 lumens. It shines a natural white color with a temperature of 4500K which is cool for the garden, patio, or street. Also, this solar street light runs on a premium LiFePO4 6000 MaH battery.

What are traditional solar street lights?

Traditional solar street lights are the type of street light that has its accessories, panels and fixtures connected by wires. Besides, the traditional street lights use lead-acid batteries for power. The lead-acid batteries take a long time to discharge but, they tend to get spoilt in no time.

How long does a solar street light battery last?

So, when choosing your solar street light, ensure that its battery can last for at least 10 hours. Not only that, the battery should become fully charged in little or no time. Although it depends on the battery capacity, it should not take more than 8 hours before the battery fully charge.

How bright is a solar street light?

To know how bright a solar street light is, you need to check its lumen rating. The higher the lumen rating, the brighter the solar light is. Ideally, the best solar street light should not have a lumen rating of less than 1000. You can go for a higher or lower one depending on your choice.

What is integrated solar street light?

The world has evolved and gradually, everyone is moving to the integrated street light. The reason is simple; the integrated solar street light has all its features integrated into the street light. These features include a PIR motion sensor, light sensor, solar panel, and angle shifter.
